
LSS2200-8P Release Notes**Date: December 5, 2023****Version: 2.0.0.0R4**

Overview

This release note covers firmware version 2.0.0.0R4 for the LSS2200-8P.

Release Changes and Enhancements

- Added security audit log for administrator users.
- Made SSH configurable.
- Added save button in Web GUI to save configuration changes from each page.
- Added configurable login timeout for Web GUI and CLI.
- Added web pages to view syslog and audit log.
- Added auto refresh button to various web pages.
- Added admin command to download saved logs.
- Added support for Lantronix cloud platform – PercepXion.

Bugs Fixed

- Improvements to “show ip neighbors” command to make it more user friendly.
- Limit number of open, unauthenticated sessions to 10. User configurable setting and does not affect number of authenticated sessions possible.
- Factory default of switch now removes a customer installed webserver certificate.
- When adding a logical interface and selecting DHCPv6 it produced an error message.
- Fixed typo on PoE Scheduler web page.
- Improved ping function from web GUI.

Known Issues

- Switch log timestamps are not following configured time zone settings.
- DHCP snooping does not work with client/server/relay modes.
