

SM24DPB Release Notes

Date: Jun.6, 2016

Version: 6.46.1860

Overview

This release notes covers firmware version v6.46.1860 for SM24DPB.

Release Changes and Enhancements

Firmware Version: v6.46.1860

[Modification]

=====
* Change the default configuration of Bonjour Discovery to disabled.

[Fixed]

- =====
* Add online Help for the Bonjour Discovery.
* Sflow configuration will be reset when timeout value is counting to 0.
* Modify the save configuration can't be executed during firmware upgrade to avoid flash read/write conflict.
* DHCP Server Global mode will be disabled when changing gateway IP from DMS page.
* When DMS enable, VLAN port role will be changed when the port state becomes link down.
