

IONMM Release Notes

Date: October 21, 2016

Version: 1.3.15

Overview

This release note covers the requirements, important notes, new features and changes, addressed issues, and known limitations for the IONMM product.

Access to the management data from the IONMM is available using a web browser, FocalPoint, or Command Line Interface (CLI) via the local USB port or telnet. Management is also available via SNMP.

Requirements:

Firmware version 1.3.15 and these release notes apply to the following products:

- IONMM

New Features and Enhancements:

The following is a list of new features and enhancements in version 1.3.15

- Added support for an automatic web log-in timeout. After 15 minutes of inactivity, the user will automatically be logged out of the web based management session.
- Includes support for a new feature added to the C4110-4848 converter, which displays SFP vendor specific information in the DMI statistics area of the management interface.
