ION C2110 Release Notes
Date: September 12, 2011
Version: 1.2.0

Overview
This release note covers the requirements, important notes, new features and changes, addressed issues, and known limitations for the ION C2110 product.

Management of the ION C2110 is available when installed in an ION219-x chassis along with an IONMM management module. Management information is available through a web browser, Command Line Interface (CLI) via the IONMM, or via SNMP.

Requirements:
Firmware version 1.2.0 and these release notes apply to the following products:
  • C2110-10xx

New Features and Enhancements:
The following list is new features and enhancements for version 1.2.0 of the ION C2110 products.
  • Cold start-up time has been improved. The ION chassis, power supplies, and slide-in-cards will boot up and be ready for SNMP based management in less than half the time required with the previous version.

Fixes:
  • While in hardware- mode, only the dip-switches can be used to set product configuration. The software management interface will only display current operating and configuration status. Changes to the products configuration can no longer be set via software, while in hardware-mode.

Known Feature Limitation:
  • None
