

DbManager Release Notes

Date: 7/25/2013

Version: 8-29 b3-1

Overview

This release note covers the major updates to DbManager since the last release and any known issues in the DbManager release.

Requirements

DbManager requires a windows operating system in order to be installed. Please see DbManager User manual for detailed hardware requirements.

Supported Platforms

DbManager runs on Windows 2000, Windows 2000 Server, Windows XP, Windows Vista, Windows 7, Windows 8, Windows 2003 Server, Windows 2008 Server (both 32 bit and 64 bit)

Release Changes and Enhancements

Release 8-29 b3-1 adds the following bug fixes

- Fix so that whether the ISU device is strung for ISU 'S' or ISU 'U' the ports and channel selection are configured correctly

Known Limitations and Restrictions

- There is no Southbound SNMP communication to the device. However, DbManager is able to send SNMP traps to a PC running SNMP monitoring software.
- DbManager can be provided to support up to 15 user seats, with each seat having full visibility of the network map and connection to devices.

Supported Devices:

This version of DbManager supports all versions to date of the following products:

- PacketBand
- Mediaband
- Liberator
- DataBand
