## SM24DPB Release Notes

**Date:** Feb.7, 2020

**Version:** 6.54.3359

---

### Overview

This release notes covers firmware version v6.54.3359 and MIB file for SM24DPB.

### Release Changes and Enhancements

Firmware Version: v6.54.3359

#### Changes

---

- \* Modify topology view right side function key design.
- \* Add Click Save Button when Save Start Button on Web UI.
- \* Add PoP “Traffic Monitor feature is only available on master switch” Message on All Supported DMS Switches Web UI.
- \* Add a field to show Aggregated Bandwidth information on Link Aggregation feature.
- \* Password encryption enhancement
- \* Add "SNMP Server location" command
- \* Add Traffic monitor back to DMS
- \* Fixed Nessus plugin #35291 for SSL cipher issues.

#### [Fixed]

---

- \* NTP: NTP sync interval is not accurate.
- \* DMS: When DMS disable, and reboot after save start, the IP interface still sends ARP to scanning on the network segment device.
- \* CLI: CLI still has CableDiag.
- \* Ping reply from switch is irregular and bad when connecting SFP modules, especially the module supports DDM function.
- \* Web: After saved startup configuration via CLI, the disk is still flashing blue from the GUI.
- \* Web: Message "CCC" pops up after logging out of WebUI.
- \* No r-ring is provided and bonjour is provided.
- \* CLI: Show aggregation does not include Speed.
