

PWXC HSPA+ upgrade to 7.8.0.0 R20:

- 1 Take a backup of the existing device configuration by Export XML (with export secrets option)
- 2 Save the backup XML file to local computer
- 3 PWXC HSPA+ serial recovery using Device Installer
 - o Select Device Model: PremierWave XC HSPA+ P6
 - o Check 'Erase All Flash'.
 - o Select Firmware file: premierwave_xc_hspa_7_8_0_0R20.rom
- 4 After serial recovery, check device status/firmware version via WebManager.
- 5 Restore device configuration by importing the backup XML file from step 2.
